The lift truck product line remarkably comprises of 63 distinctive versions consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion forklifts. Capacities of these numerous truck models range from 3,000 to 33,000 lbs. All vehicles are manufactured in an ISO 9001 certified facility.

Doosan Infracore America is the fastest growing lift truck company in the North American market, thanks to their reliability in maintaining a high degree of consumer service excellence and optimum product performance to all Doosan Infracore Lift Truck users. The U.S. lift Truck division stationed in Cleveland has a skilled team experienced in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's initial home-based lift truck market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. began to import assembled forklifts as part of a nationwide machinery expansion project. Early sales of this industrialized equipment focused on large business communities, the armed services and on state-run firms. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical education grew to become the new focus for improving quality and product development.

Daewoo began the first domestic forklift business in 1967, and rapidly gained a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's superior technological advancements combined with sales success placed them in a position of significant expansion of their forklift operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative venture project to counter act competitive pressures in the US materials handling industry. This venture radically expanded Daewoo's lift truck sales. Construction was finished in 1984 to facilitate a contemporary plant which helped set up the company for the fabrication of high end added-value products suited for export. In 1993, the company had a international sales network and started exporting versions they had established through in-house expertise, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into overseas marketplaces.
