

Barrel Clamp

Barrel Clamps - Known as "Barrel Clamp", this hydraulic accessory is actually used on forklifts in order to compress items that you want to transfer with the forklift. Normally, they're used so as to handle kegs, paper rolls and barrels, along with several barrel clamp designs having the ability to rotate the load. For example, the revolving function permits the person operating the forklift to be able to slot in a vertically stored paper into the horizontal intake of a printing press.
